

NIST 800-171 CASE STUDY

US Government Contractor Stellar
Trusts Ice Consulting To Assist
Them In Adopting The Nist
800-171 Cybersecurity Framework

Fast Facts:

Industry: DOD Prime Contractor

Company size: 300+ Employees (Private company)

Location: Palo Alto

Challenge

Stellar is required to comply with the standards of NIST regulation 800-171. The Cybersecurity Framework (CSF) details the policies, procedures, and steps necessary to protect an organization from possible threat situations government organizations and contractors face from bad actors both internal and external.

Solution

Stellar enlisted the assistance of ICE Consulting, to make the necessary changes to their IT infrastructure. ICE worked with Stellar's Security personnel to set up the right hardware including new next generation Firewalls, advanced management software, and compliant VPN services to meet the standards.

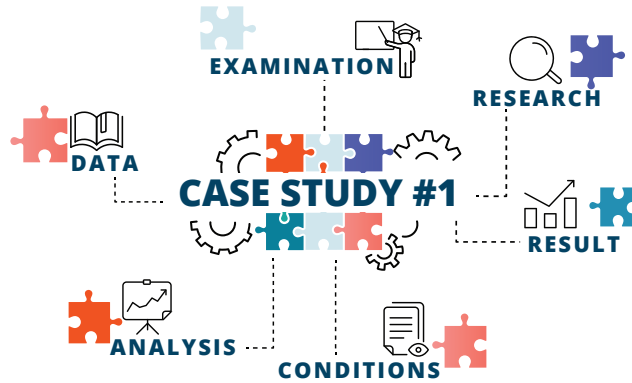

Results

Stellar, with the assistance of ICE Consulting's compliance specialists, met the standards to become NIST 800-171 compliant. ICE is currently assisting this company in the CMMC (Cybersecurity Maturity Model Certification) process.

Industry/vertical

Government Contractors

Stellar Solutions is a woman-owned small business founded by Celeste Ford in 1995 with a simple vision: satisfy our customers' critical needs while realizing our dream jobs. Nearly 20 years later, the company's guiding principles and strategic value differentiators remain the same.

Whether your goal is to achieve security compliance or obtain certification, ICE is here to assist you. As a trusted provider of SOC 2 Type II IT, Cybersecurity, Cloud, and Compliance solutions, ICE can support your company in meeting various compliance standards and certifications, such as ISO, SOC, SOX, HIPAA, CLIA, HI-TRUST, and NIST.
