

SOC-AS-A-SERVICE FROM ICE

Security Operations Center-as-a-Service can shift your security posture away from one with only reactive responses to events, to a proactive model with plenty of visibility into your IT environment as well as vulnerability management before breaches occur.

Here's how we can help:

- Analyze and assess all activities across your organization's IT infrastructure
- Provide proactive real-time 24/7/365 monitoring
- Respond immediately to cyber attacks to avoid security breach
- Establish Incident Response Plan (IRP)

BENEFITS OF ICE SOCAAS

1. MONITOR

Security engineers monitoring the dashboard 24/7/365

2. SAVE

Cost saving of not having a SOC in-house is around half a million dollars

3. COLLECT

Centralized log collector to collect and store logs for audit and compliance

4. SECURE

Risk management process that reduces chances of security breaches

In addition, we've partnered with [Securonix](#) to provide an advanced security toolset for our SOCaaS solution to customers. Securonix delivers a next-generation security analytics and operations management platform for the modern era of big data and advanced cyber threats. The company was named a leader in the 2021 Gartner Critical Capabilities for SIEM (Security Information and Event Management).

"ICE Consulting is an experienced MSSP that offers a full range of security services to their customers. They have a highly skilled staff that understands the value of providing the best solutions to keep their customers protected 24/7. We see ICE Consulting as a strategic MSSP partner in a key geography with unique vertical expertise in biotechnology and life sciences."

—Dan Smith, Director, Mid-sized MSSP Business, Securonix
